

## Phonics Terminology

**Phoneme** - The smallest unit of sound.

**Grapheme** - A way of writing a phoneme.

**GPC** - Grapheme Phoneme Correspondence. Knowing a *GPC* means you can match a phoneme to a grapheme and vice versa.

**Digraph** - A grapheme containing two letters that makes one phoneme.

**Vowel digraph** - two vowels, which make one phoneme, e.g. ai, oo, ow.

**Split digraph** - two letters, split, making one phoneme, e.g. a-e as in make.

**Trigraph** - A grapheme containing three letters that makes one phoneme.

**Blend** - to draw individual sounds together to pronounce a word e.g. s-n-ai-l blends to snail.

**Oral segmenting** - To hear a word and break it up into phonemes.

**Segmenting** - To hear a word, break it up into individual phonemes and write the graphemes in the correct order.

**HFW**- High Frequency Words are words that are seen most often in reading books.

**Tricky Words** - Words that can't be segmented and blended.
